Exclusive Electrostatic Particulate Ionization (EPI)

USDA testing indicates up to 60 - 80% reduction of dust, ammonia and pathogens!

- Particulate control = effective odor control
- Treats air exhausted vertically instead of horizontally
- Freestanding – no impact on building
- Improves site aesthetics
- Limited static pressure build-up on fans, no need to boost fan horsepower
- Reduces wind interaction with fans for improved overall performance
- Rodent resistant design
- All steel (Allied Gatorshield™) frame
- Engineered for 130 mph wind and snow load of 20 lbs/ft² when installed according to engineering specifications
- Low maintenance:
 - External – self-cleaning
 - Internal – clean as needed
- Full installation or do-it-yourself kits available
- Single or multiple fan units available
- Affordable with very low operating costs, only pennies per day
